1. Operating Results

(1) Summary of business performance (consolidated)

(All comparisons are with the interim period of the previous fiscal year, unless stated otherwise.)

During the six-month period under review, the Japanese economy showed a mild recovery, supported by improvements in employment conditions and corporate earnings as various government policies took effect.

Looking ahead, heightened geopolitical risk and the rise of other uncertainties overseas mean that the situation must be watched closely.

Consolidated sales for the interim period increased 12.3% to ¥51,857 million as a result of an increase in sales in the core cosmetics and nutritional supplements businesses. Operating income was ¥3,736 million, compared to an operating loss of ¥601 million in the previous interim period, largely due to an increase in gross profit from an uptick in sales, and the efficient use of advertising expenses utilizing online advertisements. Ordinary income improved by ¥4,384 million to ¥3,843 million. Net income attributable to owners of the parent company declined ¥1,387 million to ¥2,485 million, due to effects from the recording of extraordinary income from the sale of investments in the previous period.

Segment results are as follows:

1) Cosmetics Business

Sales

Sales from the Cosmetics business increased 15.8% to ¥31,424 million.
